- Merging Text and Graphics

Lesson 6: Optimizing Graphics for the Web

- Web Graphic File Formats
- Optimizing Images

Lesson 7: Hotspot Links

- Creating Hotspots
- Assigning Links to Hotspots

Lesson 8: Slicing and Rollovers

- Slicing
- Rollovers

Fireworks MX - Level 2

Days of Training: 1

Overview

This course teaches techniques for creating and editing Web graphics and pages. Students will learn advanced skills for working with vector graphics, photographic images and effects, slicing and rollovers, symbols and animation, and exporting to HTML.

Prerequisites

Fireworks MX - Level 1

Next Steps

Dreamweaver MX - Level 1
Dreamweaver MX - Level 2

1498LGEE-ILT

Lesson 1: Vector Paths

- Vector Path Concepts
- Drawing and Editing Rough Paths
- Creating Paths Precisely with the Pen Tool
- Text and Paths

Lesson 2: Image Effects

- Improving Sharpness and Contrast
- Editing Images
- Patterns
- Masking
- Saving Effects and Styles

Lesson 3: Advanced Rollovers and Slicing

- Triggering Rollovers from Polygonal Areas
- Pop-up Menus
- Behaviors
- Navigation Bars

Lesson 4: Symbols, Instances, and Animation

- Button Symbols
- Graphic Symbols
- Creating Animation

Lesson 5: Exporting Pages for a Website

- Text Slices
- HTML Export Options
